

The movie web scrapping project

Task: In this project your task is to do web scrapping for the below link provided, and store the data in the CSV file.

2) **After scrapping the data You are required to load the data in pandas and do some EDA and provide some useful graphical information.**

In your csv file the data should consist of following coloumns, i am providing a dummy table here for your reference kindly create your csv when you do web scrapping in the following way.

Example

Name	Rating	Genre	Release date	Runtime	Director	Url
Mortal Kombat	79.0	Fantasy, Action, Adventure, Science Fiction	04/23/2021	1h 50m	Lewis Tan	https://www.themoviedb.org/movie/460465
Godzilla vs. Kong	82.0	Science Fiction, Action	03/31/2021	1h 53m	Alexander Skarsgård	https://www.themoviedb.org/movie/399566

Link to scrap data: <https://www.themoviedb.org/movie>

Submission Type: Kindly upload your project on **github** with the source code. **You are requested to make me a member of your project** when your upload it on github. And make sure you make your project private for time being.

My github id is : **mavrick08**

Last Date of Submission: **22nd November 2021.**
